RAVI M

Generative AI Developer | LLM Applications & AI Agents | Python Backend Engineering

Coimbatore, Tamil Nadu, India | 9384710789 | ravimanikandanm@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Generative AI Developer with experience building enterprise AI applications, LLM-integrated automation, and scalable backend systems. Skilled in designing AI agents and Retrieval-Augmented Generation (RAG) pipelines, and in building RESTful API architectures using Python, FastAPI, LangChain, and the OpenAI API. Experienced across the Generative AI development lifecycle — from Databricks-based data engineering and Medallion architecture pipelines to production-oriented backend services built within the Databricks ecosystem. Focused on delivering reliable AI pipelines and intelligent automation that integrate cleanly into enterprise software workflows. Advancing applied AI and data engineering expertise through an M.Sc. in Data Science and Business Analytics.

TECHNICAL SKILLS

Programming Languages: Python, SQL, XML, Pyspark

AI / Generative AI: Generative AI, AI Agents, Prompt Engineering, Model Evaluation, AI Automation, Workflow Automation

LLM Technologies: LangChain, OpenAI API, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LLM Integration

Backend Engineering: FastAPI, Flask, RESTful API Design, API Integration, Odoo Framework

Data Engineering: Databricks (Medallion Architecture), Databricks, Metadata Generation, AI Pipelines

Databases & Tools: PostgreSQL, Git, GitHub, Data Validation & QA

PROFESSIONAL EXPERIENCE

GenAI Developer — Data Pattern *Aug 2026 – Present*

- Contribute to the development of AI agents and LLM-integrated workflows, building on the Databricks Medallion architecture pipelines from the internship phase.
- Assist in designing and implementing RAG pipelines and LangChain-based agents to automate data modeling, validation, and reporting workflows within the Databricks ecosystem.
- Develop and maintain RESTful APIs supporting AI-driven automation, deployed and orchestrated on Databricks.
- Collaborate with senior engineers and cross-functional teams to translate business requirements into GenAI features, improving pipeline reliability.
- Support model evaluation and prompt engineering efforts to improve accuracy and robustness of deployed LLM-based agents.

GenAI Intern — Data Pattern *Apr 2026 – Jun 2026*

- Engineered Gold and Silver layer pipelines within a Databricks Medallion architecture, transforming raw enterprise data into structured, analytics-ready datasets for downstream AI workflows.
- Delivered 50+ RESTful APIs across 12 automated workflows, enabling reliable end-to-end orchestration for enterprise data and AI pipelines.
- Built an AI-powered checksum validation agent to automate data integrity verification, reducing dependency on manual checks and strengthening pipeline trustworthiness.
- Developed an AI data modeling agent using LLMs to automate schema design and structured data generation, accelerating pipeline development cycles.
- Implemented systematic data validation across pipeline stages, improving accuracy, consistency, and audit-readiness of enterprise datasets.
- Partnered with cross-functional engineering teams in an agile, Git-based workflow to ship production-oriented AI and data features.

Junior Odoo Developer — BizTechnovations Private Limited *Jun 2024 – Jul 2025*

- Engineered backend logic and RESTful APIs in Python to extend Odoo ERP functionality, aligning system behavior with enterprise client requirements.
- Customized and maintained Odoo ERP modules supporting production-grade enterprise software used across client business operations.
- Optimized PostgreSQL queries and backend processes, improving application performance and system reliability.
- Automated recurring business workflows, reducing manual operational effort and streamlining processes for end users.

- Built and maintained third-party service integrations, ensuring consistent, reliable data synchronization across enterprise systems.

PROJECTS

AI Agent for Data Modeling

- Built an LLM-based agent to automate data modeling and schema generation — reducing the manual effort typically required to design structured data pipelines.

Brand Sentiment Analysis

- Developed a text analytics system to evaluate brand-related content and classify sentiment trends, applying NLP techniques to surface actionable audience insight.

Smart Parking System

- Designed a software-based smart parking management solution to streamline real-time slot allocation and monitoring, reducing manual coordination.

EDUCATION

M.Sc. Data Science and Business Analytics — Rathinam Global University *2025 – 2027 (Expected)*
CGPA: 8.7

B.Sc. Information Technology — Hindustan College of Arts and Science *2021 – 2024*
CGPA: 7.2

CERTIFICATIONS & LANGUAGES

- Microsoft Certified: AI & Machine Learning | Big Data & Data Science | Linux Administration Fundamentals
- Relevant coursework: Coursera AI/Data Science courses; Anthropic Claude Learning Program
- Languages: English, Tamil, Kannada
